Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II - Poland

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier					
Product name	Castrol Outboard 2T				
Product code	456657-IT01				
SDS no.	456657				
Product type	Liquid.				
1.2 Relevant identified uses	of the substance or mixture and uses advised against				
Use of the substance/ mixture	Small engine oil. For specific application advice see appropriate Technical Data Sheet or consult our company representative.				
1.3 Details of the supplier o	f the safety data sheet				
Supplier	BP Europa SE, Oddział w Polsce ul. Jasnogórska 1 31-358 Kraków				
	Biuro Handlowe: ul. Chłodna 51 00-867 Warszawa tel: +48 22 582 65 00 fax: +48 22 582 65 02				
E-mail address	MSDSadvice@bp.com				
1.4 Emergency telephone no EMERGENCY					
TELEPHONE NUMBER	Carechem: +44 (0) 1235 239 670 (24/7) + 48 22 582 65 80 (toxicology information)				
SECTION 2: Hazards	identification				
2.1 Classification of the sub					
Product definition	Mixture				
Classification according to Not classified.	Regulation (EC) No. 1272/2008 [CLP/GHS]				
	Directive 1999/45/EC [DPD]				
-	as dangerous according to Directive 1999/45/EC and its amendments.				
See sections 11 and 12 for m	nore detailed information on health effects and symptoms and environmental hazards.				
2.2 Label elements					
Signal word	No signal word.				
Hazard statements	No known significant effects or critical hazards.				
Precautionary statements					
Prevention	Not applicable.				
Response	Not applicable.				
Storage	Not applicable.				
Disposal	Not applicable.				
Supplemental label elements	Not applicable.				
Special packaging requiren	<u>nents</u>				
Containers to be fitted with child-resistant fastenings	Not applicable.				
Product name Castrol Outboa	ard 2T Product code 456657-IT01 Page: 1/10

(Poland)

SECTION 2: Hazards identification

Tactile warning of danger

2.3 Other hazards

Other hazards which do not result in classification

Defatting to the skin.

Not applicable.

NOTE: Product diluted with petrol must be handled with the same precautions used for petrol. Before mixing, the Safety Data Sheet for petrol should be consulted for any precautionary measures necessary.

SECTION 3: Composition/information on ingredients

Substance/mixture

Mixture

Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives.

			Class	sification	
Product/ingredient name	Identifiers	%	67/548/EEC	Regulation (EC) No. 1272/2008 [CLP]	Туре

<u>Type</u>

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid me	easures
Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms appear.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of any immediate medical attention and special treatment neededNotes to physicianTreatment should in general be symptomatic and directed to relieving any effects.

Product name	Castrol Outboard 2T		Product code	456657-IT01	Page: 2/10
Version 4	Date of issue 2 December 2015	Format	Poland	Language	ENGLISH
			(Poland)		

SECTION 5: Firefighting measures

🖟 case of fire, use water fog, alcohol resistant foam, dry chemical or carbon dioxide extinguisher or spray.
Do not use water jet.
m the substance or mixture
In a fire or if heated, a pressure increase will occur and the container may burst.
Combustion products may include the following: carbon oxides (CO, CO ₂) (carbon monoxide, carbon dioxide)
Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, prot	ective equipment and emergency procedures				
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.				
For emergency responders	Entry into a confined space or poorly ventilated area contaminated with vapour, mist or fume is extremely hazardous without the correct respiratory protective equipment and a safe system of work. Wear self-contained breathing apparatus. Wear a suitable chemical protective suit. Chemical resistant boots. See also the information in "For non-emergency personnel".				
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).				
6.3 Methods and material for c	containment and cleaning up				
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.				
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.				
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.				

SECTION 7: Handling and storage

7.1 Precautions for safe ha	ndling
Protective measures	Fut on appropriate personal protective equipment. NOTE: Product diluted with petrol must be handled with the same precautions used for petrol. Before mixing, the Safety Data Sheet for petrol should be consulted for any precautionary measures necessary.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

Product name Castrol Outboard 2T		Product code 456	657-IT01	Page: 3/10	
Version 4	Date of issue 2 December 2015	Format	Poland	Language	ENGLISH
			(Poland)		

SECTION 7: Handling and storage

7.2 Conditions for safe	Store in accordanc	e with local regulations. Store in a dry, cool and well-ventilated area, away	
storage, including any ncompatibilities	from incompatible in container tightly clo be carefully reseate containers designe	npatible materials (see Section 10). Keep away from heat and direct sunlight. Keep tightly closed and sealed until ready for use. Containers that have been opened must ly resealed and kept upright to prevent leakage. Store and use only in equipment/ s designed for use with this product. Do not store in unlabelled containers.	
Not suitable	Prolonged exposure to elevated temperature.		
7.3 Specific end use(s)			
Recommendations	See section 1.2 an	d Exposure scenarios in annex, if applicable.	
SECTION 8: Exposure	controls/pers	onal protection	
8.1 Control parameters			
Occupational exposure limits			
Product/ingredie	ent name	Exposure limit values	
Base oil - unspecified		Rozporządzenie Ministra Pracy i Polityki Społecznej (Dz. U. 2002 Nr 217, poz. 1833, z pózn. zm.) (Poland). STEL: 10 mg/m ³ 15 minutes. Issued/Revised: 11/2002 Form: mist TWA: 5 mg/m ³ 8 hours. Issued/Revised: 11/2002 Form: mist

		e shown in this section, other components may be present in any mist, Ls may not be applicable to the product as a whole and are provided for	
Recommended monitoring procedures	biological monitorir control measures a should be made to (Workplace atmosp agents for compari 14042 (Workplace assessment of exp (Workplace atmosp measurement of ch	ains ingredients with exposure limits, personal, workplace atmosphere or ng may be required to determine the effectiveness of the ventilation or other und/or the necessity to use respiratory protective equipment. Reference monitoring standards, such as the following: European Standard EN 689 obsers - Guidance for the assessment of exposure by inhalation to chemical son with limit values and measurement strategy) European Standard EN atmospheres - Guide for the application and use of procedures for the osure to chemical and biological agents) European Standard EN 482 obsers - General requirements for the performance of procedures for the nemical agents) Reference to national guidance documents for methods for of hazardous substances will also be required.	
Derived No Effect Level No DNELs/DMELs available.			
Predicted No Effect Concentr	ation		
No PNECs available			
3.2 Exposure controls			
Appropriate engineering controls	Provide exhaust ventilation or other engineering controls to keep the relevant airborne concentrations below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to ensure exposures are adequately controlled. Personal protective equipment should only be consider after other forms of control measures (e.g. engineering controls) have been suitably evaluate Personal protective equipment should conform to appropriate standards, be suitable for use, kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on selection a appropriate standards. For further information contact your national organisation for standar The final choice of protective equipment will depend upon a risk assessment. It is important to ensure that all items of personal protective equipment are compatible.		
)e		
Individual protection measure	<u></u>		
Individual protection measure Hygiene measures	Wash hands, forea smoking and using	arms and face thoroughly after handling chemical products, before eating, g the lavatory and at the end of the working period. Ensure that eyewash g showers are close to the workstation location.	

Product name	Castrol Outboard 2T		Product code	456657-IT01	Page: 4/10
Version 4	Date of issue 2 December 2015	Format	Poland	Language	ENGLISH
			(Poland)		

SECTION 8: Exposure controls/personal protection

Respiratory protective equipment is not normally required where there is adequate natural or local exhaust ventilation to control exposure.

In case of insufficient ventilation, wear suitable respiratory equipment.

The correct choice of respiratory protection depends upon the chemicals being handled, the conditions of work and use, and the condition of the respiratory equipment. Safety procedures should be developed for each intended application. Respiratory protection equipment should therefore be chosen in consultation with the supplier/manufacturer and with a full assessment of the working conditions.

Eye/face protection Skin protection Hand protection Safety glasses with side shields.

General Information:

Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).

Gloves should be chosen in consultation with the supplier / manufacturer and taking account of a full assessment of the working conditions.

Recommended: Nitrile gloves. **Breakthrough time:**

Breakthrough time data are generated by glove manufacturers under laboratory test conditions and represent how long a glove can be expected to provide effective permeation resistance. It is important when following breakthrough time recommendations that actual workplace conditions are taken into account. Always consult with your glove supplier for up-to-date technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:

Continuous contact:

Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained.

If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.

Short-term / splash protection:

Recommended breakthrough times as above.

It is recognised that for short-term, transient exposures, gloves with shorter breakthrough times may commonly be used. Therefore, appropriate maintenance and replacement regimes must be determined and rigorously followed.

Glove Thickness:

For general applications, we recommend gloves with a thickness typically greater than 0.35 mm.

It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be based on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.

Note: Depending on the activity being conducted, gloves of varying thickness may be required for specific tasks. For example:

• Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.

• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.

Product name	Castrol Outboard 2T		Product code	456657-IT01	Page: 5/10
Version 4	Date of issue 2 December 2015	Format	Poland	Language	ENGLISH
			(Poland)		

SECTION 8: Exposure controls/personal protection

•	
Skin and body	Use of protective clothing is good industrial practice. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.
Refer to standards:	Respiratory protection: EN 529 Gloves: EN 420, EN 374 Eye protection: EN 166
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Colour	Blue.
Odour	Oily.
Odour threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Flash point	Closed cup: 75°C (167°F) [Pensky-Martens.]
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	867 kg/m³ (0.867 g/cm³) at 20°C
Solubility(ies)	insoluble in water.
Partition coefficient: n-octanol/ water	>3
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 8.5 mm²/s (8.5 cSt) at 100°C
Explosive properties	Not available.
Oxidising properties	Not available.

9.2 Other information

No additional information.

SECTION 10: Stability and reactivity					
10.1 Reactivity	No specific test data available for this product. Refer to Conditions to avoid and Incompatible materials for additional information.			Incompatible	
10.2 Chemical stability	The product is stable.				
10.3 Possibility of hazardous reactions	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.			ccur.	
10.4 Conditions to avoid	Avoid all possible sources of	ignition (spark o	or flame).		
Product name Castrol Outbo	ard 2T		Product code	456657-IT01	Page: 6/10

```

Spills may form a film on water surfaces causing physical damage to organisms. Oxygen transfer could also be impaired.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product

Methods of disposal

Where possible, arrange for product to be recycled. Dispose of via an authorised person/ licensed waste disposal contractor in accordance with local regulations.

Hazardous waste Yes. European waste catalogue (EWC)

Waste code	Waste designation		
1 /3 02 08*	other engine, gear and lubricating oils		
However, deviation from the intended use and/or the presence of any notential contaminants may require an alternative waste			

However, deviation from the intended use and/or the presence of any potential contaminants may require an alternative waste disposal code to be assigned by the end user.

Packaging

Methods of disposalWhere possible, arrange for product to be recycled. Dispose of via an authorised person/
licensed waste disposal contractor in accordance with local regulations.Special precautionsThis material and its container must be disposed of in a safe way. Care should be taken when
handling emptied containers that have not been cleaned or rinsed out. Empty containers or
liners may retain some product residues. Vapour from product residues may create a highly
flammable or explosive atmosphere inside the container. Empty containers represent a fire
hazard as they may contain flammable product residues and vapour. Never weld, solder or
braze empty containers. Avoid dispersal of spilt material and runoff and contact with soil,
waterways, drains and sewers.

SECTION 14: Transport information
